

## NCPO MIDWEST REGIONAL WORKSHOP - OCTOBER 27, 2001

You are invited to attend the National Client Protection Organization (NCPO) Midwest Regional Workshop to be held in Columbus, Ohio on Saturday, October 27, 2001.

**SCOPE:** The NCPO, through its sponsorship of regional workshops, seeks to enhance the network created at the American Bar Association's (ABA) National Forum on Client Protection by providing an opportunity to focus entirely on some of the most challenging and difficult client protection issues. This workshop will provide an opportunity for those involved in client protection to obtain critical information on loss prevention measures and to exchange information on client protection policies, procedures, and strategies for dealing with difficult issues. The workshop is open not only to those in the Midwest region, but also those in other parts of the country who would like to interact with others involved in client protection.

**LOCATION:** The Adam's Mark Hotel is located in downtown Columbus approximately 15 minutes from Port Columbus. Flights are available to Columbus from most major U.S. cities and from Canada. Client protection has existed in Ohio for the past 16 years, but this is Ohio's first opportunity to host a regional workshop on client protection. We have planned what we hope will be a very informative day and a very nice visit to Columbus, Ohio's capital city.

**AGENDA:** [A draft Workshop Agenda](#) is enclosed. Please Janet Marbley Green at (614) 995-5000 if you have any topic(s) you would like to add to the agenda. If you would like to not only attend the Workshop, but also participate as a presenter or in some other capacity, please contact Ms. Marbley by phone or e-mail at [MarbleyJ@sconet.state.oh.us](mailto:MarbleyJ@sconet.state.oh.us) right away.

**REGISTRATION:** Both new and experienced participants will benefit from NCPO's Midwest Regional Workshop. Your attendance and participation will make this one-day, inexpensive Workshop a valuable experience. [The registration form is enclosed.](#)
